

# Manage your staff more efficiently, increase performance and save time and money

Time Target

Some days it can be hard enough to manage putting a matching pair of socks on, let alone manage your staff. That's why we created Time Target.

Time Target has been designed to help you save money on wages and increase staff performance, so you can get back to doing what you do best. By allowing you to easily streamline and automate a range of processes, you can reduce costs and eliminate errors. And the best part is, it's so easy to use that very little technological skills are required.

#### Business Benefits:

- Manage staff rosters across multiple departments, in multiple locations and on multiple pay rates
- Handle staff availability planning, roster across shifts and budget by dollars, hours, or both
- Send casual staff rosters via SMS
- See snapshots of productivity and attendance to determine how much staff are costing at any point in time
- View the status of all staff on one screen at the touch of a button
- Broadcast messages and allocate task lists to individuals, a selected group, or the entire team
- Set up time or event driven alerts and reminders that can be sent to mobile phones
- Easily view probation periods, birthdays, anniversary dates, sick leave, annual leave or time in lieu
- Clock staff in and out using a finger vein scanner – this offers greater reliability and security over traditional finger print scanners
- Reduce time theft by employers
- Time Target interfaces to your payroll system, improving accuracy and saving you time and money on operating costs
- Integrates into WorldSmart Business Intelligence to help you measure money spent on operating costs, store sales, actual wage, costs and budgets
